SUMMARY

Junior Machine Learning Engineer with hands-on experience building and deploying predictive models in Python. Skilled in data cleaning with Pandas, SQL, and scikitlearn, and in creating RESTful APIs with Flask. Proven ability to translate analytical insights into actionable business recommendations.

EDUCATION

B.Tech in Computer Science | Sri Venkateswara Engineering College | 2021 - 2025 | CGPA 8.2/10

SKILLS

Languages: Python, SQL, JS

Libraries: Pandas, NumPy, scikitlearn, Flask, Git

Frameworks & Libraries: RESTful APIs

Tools & Platforms: NLP

PROJECTS

Movie Recommender | Tech: Python, scikitlearn, Flask

- Designed a collaborative filtering recommender for 100k ratings
- Implemented a Flask RESTful API to serve recommendations

Fake News Detector | Tech: Python, NLP, scikitlearn

- Created a TFIDF based text classifier with logistic regression

EXPERIENCE

Data Science Intern | InsightWorks Analytics | May 2024 - Jul 2024

- Built a churn prediction model in scikitlearn achieving 84% accuracy
- Cleaned and transformed sales data using Pandas and SQL
- Developed a Flask RESTful API to expose model predictions

CERTIFICATIONS

- Machine Learning Specialization (Coursera)
